

Table 5.0 Illustration on how to Move and Capture

The Attack move of Piece	Move and Capture	Interpretation
Steward and Supremo 1 step-1 space to capture		A Steward or Supremo move at any direction for 1 step only then capture the target piece 1 space in front (single or multiple). End of the turn.
Deacon 1 step-2 and spaces to capture		A Deacon move at any direction for 1 step only then capture the target piece 2 spaces in front (single or multiple) in a straight line, clear path without obstruction. End of the turn.
Archer 1 step-3 spaces to capture		An Archer move at any direction for 1 step only then capture the target piece 3 spaces in front (single or multiple) in a straight line, clear path without obstruction. End of the turn.
Minister and Supremo Moves in diagonal direction and 1 space to capture		A Minister /Supremo move for 2 steps, nor made an overlap steps (leap over) then capture the target piece 1 space in front (single or multiple). End of the turn. In the Illustration notice there's a broken line towards the back, it means the Minister made the capture first since it is in the range.
Minister and Supremo Moves in "L" or zigzag pattern and 1 space to capture		A Minister/Supremo, move in an "L" Pattern nor made an overlap steps (leap over) then capture the target piece 1 space in front (single or multiple). End of the turn.
Viceroy & Chancellor Moves in diagonal direction and 2 spaces to capture		A Viceroy, for 2 steps, nor made an overlap steps (leap over) then capture the target piece 2 spaces in front (single or multiple) in a straight line, clear path without obstruction. End of the turn. Same with <u>Chancellor</u> , hence 3 spaces to capture.
Viceroy & Chancellor Moves in "L" or zigzag direction and 2 spaces to capture		A Minister/Supremo, move in an "L" Pattern nor made an overlap steps (leap over) then capture the target piece 2 spaces in front (single or multiple) in a straight line, clear path without obstruction. End of the turn. Same with <u>Chancellor</u> , hence 3 spaces to capture.

GAME MANUAL

The **EOS** or **E-One Seven** "Juego de Tactica is the latest interactive mind sports and primarily dubbed as the "Philippine Chess". It is a deliberation of purely tactical supremacy and decisiveness. It is exceptionally unique for it captures from a distance without moving towards the opponents' piece. All piece maneuvers at any direction thereby creating a variety of tactical moves. This board game thrives in the significance of each piece being integral part of the game.

Indulge and experience the exciting, educational and **Extra Ordinary Sports** of the mind and shall become a **SUPREME TACTICIAN**.

Two ways to learn EOS

1. Learn How to Move. All pieces move 1, 2 or 3 steps at any direction; diagonal, zigzag or "L" pattern, either left, right, backward or forward. It can also jump over 1 or 2 pieces in front. When in default position, all first step can move up to 4 steps and can even jump up to 3 pieces in front. (See Figure 2.0)

Type of moves

- a. Advance move – Is use only for fast movement of pieces, it sets the desired position of pieces for its tactical formation. However, it deactivates the power to capture even the opponent's piece is with in range. Pieces can move up to 4 steps when move for the first time and up to 3 steps in the succeeding moves.
 - b. Attack move – Is used to capture the opponent's piece within range. Every piece has its own attack move. (See Figure 1.0)
2. Learn how to capture. All pieces can only capture using the attacked move and each has its own range/distance to capture. It is not moving towards the opponents' space but from a certain distance. When it captures it must be in a straight line, clear path without obstruction. (See Figure 3.0)
 - a. Pieces are set according to attacked move.
 - i. 1 step attacked move. The Steward, Deacon and Archer can only capture using 1 step.

The **Steward** moves 1 step and can capture 1 space in all sides.

The **Deacon** moves 1 step and can capture exactly 2 spaces in all sides in a straight line, clear path without obstruction.

The **Archer** moves 1 step and can capture exactly 3 spaces in all sides in a straight line, clear path without obstruction.
 - ii. 2 steps attacked move. Pieces are Minister, Viceroy and the Chancellor can only capture using its 2 steps attack move

The **Minister** moves 2 steps and can capture 1 space in all sides.

The **Viceroy** moves 2 steps and can capture exactly 2 spaces in all sides in a straight line, clear path without obstruction.

The **Chancellor** moves 2 steps and can capture exactly 3 spaces in all sides in a straight line, clear path without obstruction.

- iii. The Supremo moves either 1 or 2 steps and can capture 1 space in all sides.

Type of takes/capture

- Move and Capture – This is a common thing among board games, you move the piece and capture. However, in this board game you capture the opponent's piece from a certain distance, not like the Chess by occupy the space of the opponent's piece nor leap over like the Checkers.
- Capture and Move – This type of capture makes the board game unique among others. There are instances that the piece either tactically place nor force to be at the opponent's range then it can be captured even without making a move first. However, the piece who made the "capture first" must do the compulsory move according to its "attack move" and not the advance move.

Objective. Capture the Supremo (the Supreme piece) or by "Solitude". (Solitude if the Supremo is left all alone on the battle board).

Overlap Steps. All pieces can execute an overlap steps/ leap over from a single or two pieces (member or opponent's piece) in front and land on the second or third spaces at any direction. (See Table 2.0 & 3.0)

Capture. Right after executing the attack move, a player captures immediately the target piece/s at range. (See table 4.0&5.0)

Alternating Turns. Players take alternating turns and a player completes the turn after taking a move or made a capture.

General Instruction.

- Players should trail and capture along the connecting circles only and only one piece occupies every space.
- Only one piece will be allowed to move in every turn. A piece is considered active status when it is use to move or capture and other pieces are passive.
- A player should capture in a straight direction at exact distance and clear path without obstruction.
- Always follow the attack move when capturing opponent, either "capture and move" or "move and capture".
- The game is a DRAW when either player can't contain the Supremo or setting it into solitude.

Table 1.0 Illustration on how to move

			
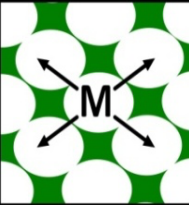

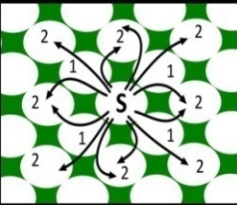

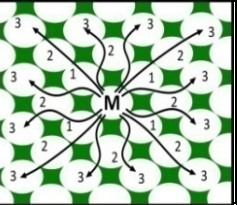

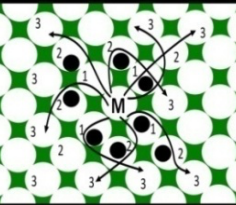

All pieces move 1, 2 or 3 steps at any direction; diagonal, zigzag or "L" pattern, either left, right, backward or forward. It can also jump over 1 or 2pieces in front. When in default position all pieces can move up to 4 steps and can even jump over up to 3 pieces in front.			

Table 2.0 Illustration on how to do the attack move

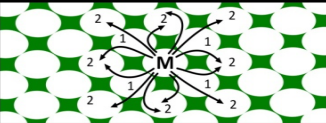

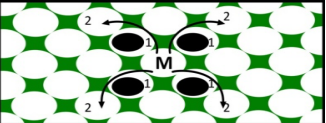

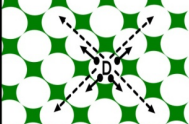

Attack move (Attack move allows the active piece to capture)		
		
A Steward, Deacon and Archer or Supremo move only 1 step.	A Minister, Viceroy, Chancellor or Supremo moves exactly 2 steps at any direction (Diagonal or "L" pattern).	The Minister, Viceroy and Supremo leap over with only two moves it can capture opponent's piece within range.

Illustration on types of Capturing Opponent

The tables 3.0 and 4.0 shows an illustration on how to use the attack move in order to capture opponent, either capture and move, or move and capture. The broken arrow (---➔) represents distance to capture while a straight arrow (➔) represents distance of movement.

Table 3.0 Illustration on how to Capture and Move

Image (Not available)	The Attack move of Piece	Capture and move (The compulsory move can also use to capture another piece at range)	Interpretation
	Steward and Supremo 1 step- 1 space capture to capture		A Steward or Supremo may capture first (single or multiple) and move at any direction for 1 step only because the attacked move is only 1. End of the turn.
	Deacon 1step-2spaces capture to capture		A Deacon may capture first (single or multiple) and move at any direction for 1 step only because the attacked move is only 1. End of the turn.
	Archer 1 step-3 spaces to capture		An Archer may capture first (single or multiple) and move at any direction for 1 step only because the attacked move is only 1. End of the turn.
	Viceroy / Chancellor 2 steps – 2 spaces capture to capture		An Viceroy may capture first (single or multiple) and move at any direction for 2 steps only because the attacked move is 2. Same with the Chancellor but it has 3 range to capture unlike viceroy has only 2. End of the turn.
	Minister and Supremo 2 steps - 1 space to capture		A Minister, Chancellor or Supremo may capture first (single or multiple) and move at any direction for 2 steps only because the attacked move is only 2. End of the turn.
